Description

The Remote Release Panel allows start and stop of max. 9 extinguishing sections from a safe location. For each section a FIRE indication and a DISCHARGE indication is available, as well as additional indications for system status and FAULT signals. The buttons for start / stop of discharge are protected by a transparent flap against unintended operation. If more than 9 sections have to be controlled, several panels can be installed in parallel.
Integration into the control system by means of 4-wire-CAN-bus.

Technical Data

Dimensions Enclosure (HxWxD):	280 x 230 x 125 mm
Distance Mounting Holes:	260 x 180 mm, D = 6,5 mm
Weight:	5 kg
Degree of Protection:	IP54
Operation Temperature:	0°C - 55°C
Current (quiescent/alarm):	33 mA / max.150 mA (@24 V)
Colour of Enclosure:	grey RAL7035
Surface of Operation Field:	black RAL9005
