PRODUCTION AFTER-SALES SERVICE WARRANTY

Over 70% of our product range is industrialised in our 20,000 m² plant in Champagne region. As our tools are often used in harsh conditions, we build them to last using premium materials and the best industrial solutions available. On this basis, we are comfortable to offer a 2 year warranty on all Virax products.

Thanks to our investments in our hardware and software capacities, we are now able to adapt in real time our production. This enables to boost our deliveries and improve our service, satisfying further market demands.

Our commitment to the quality and the excellence of VIRAX products relies on an after sales service reaching equivalent standards. Based on this principle, the VIRAX after sales team is listening and available, but also offers tools on an extranet to simplify customer requests 24/7.

RESEARCH & DEVELOPMENT

As well as monitoring technical and technological innovations in the markets and listening carefully to our customers, we are convinced that only a strict process can lead to the promotion of a quality solution.

From the basic idea to the day the product is available on the shelves, the complete company is involved in the research and development process for a VIRAX product. Several prototypes may be required to meet both our requirements and the customer's needs

New products and upgrades at our R&D unit in Epernay are systematically based on a deep-rooted drive:

- The drive to satisfy and plan ahead for the needs of our most demanding customers.
- The drive to create innovative tools, which are able to boost the quality and productivity of our professional customers
- The drive to surprise the market thanks to ingenious developments of our products made by our engineers.

All of the resources invested in our R&D department feed one simple ambition: establish our position as the benchmark for innovation, performance and reliability in the world of pipe tools.

VIRAX tools are by your side throughout your projects: What could you tell us?

Working since 1995, I'm the 4th generation of heating and plumbing experts in my family. In our company, VIRAX tools are passed on from father to son, sharing our professional history and expertise. Despite their age, they are still operational and active. My favourite is a copper bender, which we've had for around 45 years, and which I still take with me on jobs."

How would you describe VIRAX and its tools?

"These tools are innovative, effective and robust. VIRAX helps companies such as ours to move forward. Every VIRAX innovation is good news for plumbers."

VIRAX tools were by your side during your apprenticeship and the Worldskills France tests: How did these tools help to ensure your success?

"VIRAX is THE brand in this market. Participating in Worldskills France tests with VIRAX tools is highly reassuring as quality is on the agenda."

How would you summarise the VIRAX brand in just 3 words?

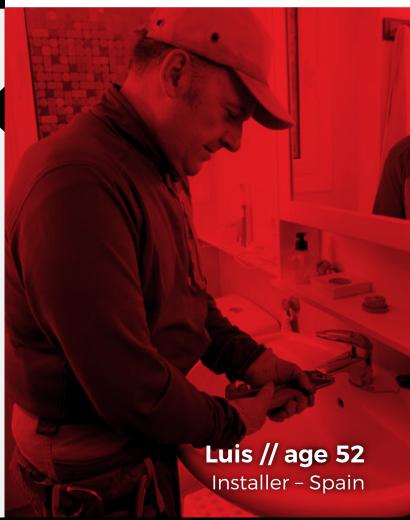

"Quality - French - Top-of-the-range."

VIRAX tools are by your side throughout your projects: What could you tell us?

"I have been using VIRAX tools for all of my plumbing and heating jobs since 1986. I work extensively with Sibéria, the test pump, Phénix, bending pliers, P25, the pipe cutter, etc. ... To cut a long story short, I practically own the entire catalogue."

How would you describe VIRAX and its tools?

"They are great tools, the best you can get for professionals. They are profitable as they are long-lasting and will not let you down in the middle of a job."

Benefit of VIRAX Soft Touch®

In addition to visually emphasize the hand's position on the tool, the Soft Touch® coating provides you with the best grip. On tools such as the PC42, it makes the tool easier to hold in the palm of your hand, and prevents cutting fatigue. On the ZR35, it enables to increase the torque applied to the slide, reducing fatigue and providing more accuracy when used. Pre-qualification and endurance tests have been carried out to determine the best combination between nuance hardness - grain for the Soft Touch®.
